**about the cosmetic product**

## **Anti-Aging Face Cream**

### **Clinical application study under dermatological control including determination of single wrinkle depth**

The test product was applied for a period of four weeks by 20 subjects once daily onto the face. After four weeks application of the test product a

#### **Reduction of single wrinkle depth by 31 %**

was quantified under clinical-dermatological control in the mean of the 20 subjects. The corresponding 20 results about percentage change of single wrinkle depth exhibited a standard deviation of 24 %.
